DEPARTMENT OF THE AIR FORCE
HEADQUARTERS ARMAMENT DIVISION (AFSC)
EGLIN AIR FORCE BASE, FLORIDA 32542

JAN 18 1983

REPLY TO

ATTN OF: YM

SUBJECT: Technical Analysis and Display System, Technical Assistance

TO:

Office of Data Processing
Central Intelligence Agency
Washington, D.C. 20505

STAT

1. The Advanced Medium Range Air-to-Air Missile (AMRAAM) is a common Air Force/Navy weapon being developed in response to joint service operations requirements. Currently, AMRAAM is in the Full Scale Development phase of the defense acquisition cycle during which an extensive test and evaluation program will be conducted. Vast amounts of data will be generated which must be managed and analyzed quickly and efficiently to meet critical program schedules and objectives.
2. Discussions between personnel from my Engineering staff and from the CIA Offices of Data Processing, and Scientific and Weapons Research have indicated that a Technical Analysis and Display System (TADS) similar to that in use by your agency would have direct application to the data analysis tasks facing the AMRAAM Program. Further, acquisition of this system by the AMRAAM program would enable us to benefit greatly, in both cost and schedule considerations, from the systems engineering and software development already accomplished by your agency.
3. Request assistance be provided by your agency in the procurement of the necessary equipment and technical support services for the implementation of a TADS capability at Eglin AFB, FL.

Henry B. Fichtel
HENRY B. FICHTEL, JR., USAF
DEPUTY FOR CHIEF OF STAFF
